# Agilence Analytics

for Restaurants

Agilence Analytics Restaurant Core addresses loss and inefficiencies across restaurant operations, delivering actionable and measurable results that reduce waste, improve compliance, and drive profitability.

△ Agilence

What Makes Us Different

- Leverage AI to improve productivity and efficiency by automatically identifying and scoring fraudulent transactions so your team doesn't have to.

- Easily access your store systems' data with our user-friendly platform that simplifies creating and customizing reports, dashboards, and queries.

- Get instant access to results with a pre-built set of 7 dashboards, 32 reports, 53 queries, 51 measures, 20 KPIs, 3 causes, and 3 resolutions, based on a decade's worth of practical experience.

- Keep your existing store systems with our integration of 200+ data sources, including POS, video, alarm, RFID, and many more.

- Enhance Analytics with add-on modules designed to seamlessly integrate with your existing systems and scale with your business.

- Partner with Agilence's award-winning Customer Success team to ensure you fully utilize the platform's capabilities.

What's Included?

Restaurant Core delivers powerful dashboards and reports designed with industry expertise and customer feedback to provide immediate results. The platform offers flexibility for customization, empowering you to tailor the platform to meet the unique needs of your company.

Area Manager
Monitor trends and anomalies across multiple locations to ensure operational consistency and uncover potential risks. Understand trends such as year-over-year store sales, top 10 discounted items, and zero movement items.

Loss Prevention: Margins
Protect profit margins by identifying and addressing behaviors such as unauthorized discounts, voids, and low-value orders. Understand the risk posed by certain employees to help reduce shrinkage and improve compliance.

Loss Prevention: Shrink
Reduce shrinkage caused by waste, theft, and pricing overrides with focused insights into key activities. Combat shrink-driving activities such as fraudulent returns, cancelled orders, and voided cash tenders.

Store Manager
Empower store managers with actionable insights to improve associate performance and address store-level challenges. Understand employee performance and optimize operations with metrics such as order duration, and item sales compared to last year.

Store Sales Performance
Optimize profitability with insights into sales trends by daypart, terminal, and menu item. Detailed insights help you maximize revenue with data on sales trends and terminal performance, while metrics like transaction duration and top-selling items highlight areas to boost operational efficiency.

High Priority Alerts
Track unresolved alerts and ensure timely resolution to minimize risks and drive operational efficiency. Gain insights into alert resolution trends and assess the effectiveness of Loss Prevention efforts to address key issues.

Extend Agilence Analytics for Restaurants

With Agilence Analytics, you can easily leverage your data to create custom reports, dashboards, and queries tailored to your unique needs. Our training ensures you'll not only master the Core offering but also gain the skills to build solutions that align perfectly with your goals.

Additionally, unlock the full potential of Analytics with Module add-ons tailored to extend your insights based on your business needs. Modules deepen your insights into inventory, RFID, Alarm, eCommerce, and Cash Over/Short data providing more opportunities for profitability.

Modules are built with the same expertise and customer input as Analytics and are designed to provide results fast.

Complete your solution with Agilence Case and Audit Management, purpose-built tools designed to streamline processes and drive impactful outcomes. Seamlessly integrate data from your Analytics Platform to create cases, launch audits based on triggers, and align with your business objectives. With the ability to bring data back into Analytics, you can track key trends and measure the impact of investigations and audits with ease.

Data Requirements

The Agilence Analytics Restaurant Core is a specialized offering of the Analytics Platform dedicated to restaurants. Agilence Analytics Restaurant Core requires POS data (TLOG), Item (product) data, HR (employee) data, and Store (location) data. This information is translated into our Agilence Data Spec (ADS) which serves as a common language to allow all systems within your company to work together.

At Agilence, we specialize in uniting digital and physical transactions to help cutting-edge loss prevention teams expand beyond traditional theft and fraud to tackle preventable loss in all its forms — in the store, online, and at the corporate office. Agilence customers realize an average 33x ROI and breakeven in 38 days.

Every day, Agilence analyzes over 24 million transactions for our customers, transforming data into insights, and insights into actions. Our platform combines data from 200+ sources, including point-of-sale (POS), eCommerce, HR, labor, inventory, product, third-party delivery platforms, alarms, case management, loyalty, access control, video surveillance, and more.

Companies have saved millions of dollars by optimizing operations, identifying sources of margin erosion and reducing shrink using Agilence. Many have also improved employee and customer safety, identified training opportunities, improved customer experiences, increased promotional success, and eliminated productivity gaps.
