Agilence
Store Audit

Agilence Store Audit allows your team to build, configure, and conduct detailed store audits seamlessly. With a few easy steps, Store Audit transforms your auditing process to ensure your stores meet all compliance requirements.

Store audits are crucial in addressing issues such as theft, safety hazards, inadequate cleaning, and mispositioned brand signage that could adversely affect your business. Prioritizing customer satisfaction means upholding unmatched store quality. Furthermore, effective risk management enables the anticipation of potential risk events, ensuring a forward-thinking strategy for any arising concerns.

Why Agilence Store Audit?

| Real-time Editing	Effortless Configurability	Mobile Accessibility
Build and score audits in real-time, ensuring your inspection forms are always up-to-date and meet the company's latest standards.	No tedious imports. No waiting on Support. Admins can build audits on the fly or design templates for reuse. Users will see those changes in real-time. Admins can also build an unlimited number of audits.	Say goodbye to redundant paperwork. Store employees can conduct and log audits directly through their mobile devices, even uploading photos and files.

For a tailored, efficient, and comprehensive store auditing experience, choose Agilence Store Audit.

How does it work?

1. Build a form

With the user-friendly form builder, you can craft comprehensive audits, however you need. Build them exactly how you want using dropdowns, checkboxes, and textual responses. Easily organize questions into sections for more detailed scoring.

2. Develop scoring

Each question can be assigned scores for accurate evaluations, offering the flexibility of both single-select and multi-select scoring options. Additionally, admins possess the ability to weigh questions variably, highlighting crucial areas.

3. Publish & receive submissions

Quickly publish your latest audit form to the field employees for immediate use. Start receiving submissions instantly.

Customizable Compliance: Your store. Your rules. Seamless audits.

At Agilence, we specialize in uniting digital and physical transactions to help cutting edge loss prevention teams expand beyond traditional theft and fraud to tackle preventable loss in all its forms — in the store, online, and at the corporate office. Agilence customers realize an average 33x ROI and breakeven in 38 days. Every day, Agilence analyzes over 24 million transactions for our customers, transforming data into insights, and insights into actions. Our platform combines data from 200+ sources, including point-of-sale (POS), eCommerce, HR, labor, inventory, product, third-party delivery platforms, alarms, case management, loyalty, access control, video surveillance, and more.

Companies have saved millions of dollars by optimizing operations, identifying sources of margin erosion and reducing shrink using Agilence. Many have also improved employee and customer safety, identified training opportunities, improved customer experiences, increased promotional success, and eliminated productivity gaps.
